

(a) Test Plan

As 'Username' is a text field, test plan for this text field should be successfully give user input by following appropriate constraints. Input can be given both manually and in an automated way. For automating user input, automation script needs to be written.

(b) Test Strategies

1. Only alphabet values are not allowed.
2. Only numeric values are not allowed.
3. Combination of alpha-numeric values is needed. These values can be both in upper or lower case.
4. Special character is not allowed as an input.
5. Empty string also not allowed as username input.
6. Length of alpha-numeric input value needs to between 6-12 characters.
7. Username length can't be less than six.
8. Username length also can't be more than twelve.
9. Space at the starting or at the end of username is not allowed.
10. Manual keyboard input can be given for username field.
11. Copy paste input can be directly given for username field.
12. Cross site scripting validation check to handle JavaScript scenarios.
13. TAB validation check.

(c) Testing Type

1. Black Box testing (Manual).
2. Automation Testing.

(d) Input Values

Dataset	Covered Test Strategies No
shihab	01, 06
234567	02, 06
Shihab234	03, 06
Shihab!	04,06
(empty string)	05
Alex1	03,07
Shihabuddin234	03, 08
(space at starting)Shihab234	03,09
